# ☐ Anesthesia ☐ Surgery ☐ Radiology Procedures ☐ Pathology and Laboratory Procedures ☐ Medicine Services and Procedures ☐ Evaluation and Management Services ☐ DME/Prosthetics or Supplies ☐ Part B Drugs

## **Service Description**

**Service Category** 

This document addresses the use of Tebentafusp-tebn (Kimmtrak®), a bispecific gp100 peptide-HLA-directed CD3 T cell engager that activates CD3+ T cells to inflammatory cytokines and cytolytic proteins, which results in direct lysis of uveal melanoma tumour cells.

## **Background Information**

Tebentafusp is a bispecific gp100 peptide-HLA-directed CD3 T cell engager indicated for the treatment of HLA-A\*02:01 – positive adult patients with unresectable or metastatic uveal melanoma. Tebentafusp is only effective in HLA-A\*02:01-positive patients.

Kimmtrak has a black box warning for cytokine release syndrome. Cytokine release syndrome (CRS), which may be serious or life-threatening, occurred in patients receiving Kimmtrak.

# **Definitions and Measures**

- Melanoma: A type of cancer that begins in the melanocytes. Melanoma is also referred to as malignant melanoma and cutaneous melanoma.
- Metastasis: The spread of cancer from one part of the body to another; a metastatic tumor contains cells that are like those in the original (primary) tumor and have spread.
- Unresectable: Unable to be removed with surgery.

## **Approved Indications**

Kimmtrak is indicated for the treatment of HLA-A\*02:01-positive adult patients with unresectable or metastatic uveal melanoma.

## **Other Uses**

None.

## **Applicable Codes**

The following list(s) of procedure and/or diagnosis codes is provided for reference purposes only and may not be all inclusive. Inclusion or exclusion of a procedure, diagnosis or device code(s) does not constitute or imply member coverage or provider reimbursement policy. Benefit coverage for health services is determined by the member specific benefit plan document and applicable laws that may require coverage for a specific service. The inclusion of a code does not imply any right to reimbursement or guarantee claim payment. Other Policies and Guidelines may apply.

HCPCS	Description
J9274	Injection, tebentafusp-tebn, 1 microgram [Kimmtrak]

ICD-10	Description
C69.30-C69.62	Malignant neoplasm of unspecified choroid

## **Medical Necessity Guidelines**

When a drug is being reviewed for coverage under a member's medical benefit plan or is otherwise subject to clinical review (including prior authorization), the following criteria will be used to determine whether the drug meets any applicable medical necessity requirements for the intended/prescribed purpose.

# Tebentafusp-tebn (Kimmtrak®)

- **A. Criteria For Initial Approval** (*Provider must submit documentation [such as office chart notes, lab results, pathology reports, imaging studies, and any other pertinent clinical information] supporting the patient's diagnosis for the drug and confirming that the patient has met all approval criteria.)* 
  - i. Individual is 18 years of age or older: AND
  - ii. Individual has a diagnosis of unresectable or metastatic uveal melanoma; AND
  - iii. Individual is using Kimmtrak for the treatment of HLA-A\*02:01 positive genotype uveal melanoma; **AND**
  - iv. Individual has an ECOG performance status of 0-1.

### B. Criteria For Continuation of Therapy

- i. MMM considers continuation of Tebentafusp-tebn (Kimmtrak®) therapy medically necessary in members requesting reauthorization for an indication listed in Section A above (Criteria for Initial Approval) when there is no evidence of unacceptable toxicity or disease progression while on the current regimen. The following information should be submitted for reauthorization:
  - A. A current oncology note documenting the patient's response to treatment showing no progression of disease.
  - B. A current oncology note documenting the patient's response to treatment showing no evidence of unacceptable toxity.

# **Healthcare Services Department**

Policy Name	Policy Number	Scope	
Tebentafusp-tebn (Kimmtrak®)	MP-RX-FP-143-24	☑ MMM MA	☑ MMM Multihealth

C. Current imaging studies and other objective measures, as appropriate, showing no progression of disease when compared with previous results.

## C. Authorization Duration

- i. Initial Approval Duration: Up to 6 months
- ii. Reauthorization Approval Duration: Up to 6 months

### D. Conditions Not Covered

Any other use is considered experimental, investigational, or unproven, including the following (this list may not be all inclusive):

i. Requests for Kimmtrak may not be approved when the above criteria (section A: Criteria for Initial Approval) are not met and for all other indications.

#### **Limits or Restrictions**

## A. Therapeutic Alternatives

The list below includes preferred alternative therapies recommended in the approval criteria and may be subject to prior authorization.

i. N/A

# B. Quantity Limitations

Approvals may be subject to dosing limits in accordance with FDA-approved labeling, accepted compendia, and/or evidence-based practice guidelines. The chart below includes dosing recommendations as per the FDA-approved prescribing information.
